COMPANY QUALITY & ENVIRONMENTAL POLICY

It is the policy of ENSPEC Power Ltd to provide products and services of the required quality to clients consistently, reliably and efficiently to enable the clients to make the best advantage of the Company's unique service. In providing this service we recognise that we are able to have an effect upon the environment, through our own activities and our influence over others.

We are responsible for delivering services that have a direct impact on our environment, and we will therefore endeavour to minimise negative and maximise positive effects on the environment as a result of our activities, integrating the consideration of environmental issues into decision making processes and achieving an appropriate balance between short term economic and longer term environmental requirements.

The pursuit of the required quality of service to its clients and the conservation of our environment through the prevention of pollution is essential to the long term growth and survival of the business. In pursuing this policy the Company believes in the concept of customer and Company working together and continually striving for improvements in quality, efficiency and environmental performance.

The objectives set by the organisation are documented in procedures and monitored during Internal Quality & Environmental Audits and reviewed during Management Review Meetings.

In order to ensure that all work is of the required quality of service to clients, the policy of the company involves all employees and subcontractors and the objectives will be communicated as widely as possible. Practical assistance and training will be given, where necessary, to ensure that knowledge and experience is acquired for the successful implementation of this policy.

The Company seeks to achieve the above objectives by maintaining an effectively managed Quality & Environmental Assurance System that complies with the requirements of BS EN ISO 9001:2000 and BSEN ISO 14001:1996. This system is defined in the Quality & Environmental Policy and Quality Procedures Manuals.

A pdf format version of this statement is publicly available upon request from our offices, or alternatively on the internet at www.enspecpower.com.

The Company's management team has adopted this policy statement.
