# ENVIRONMENTAL POLICY

Date: 24/02/09  
Authors: DAH & SGJ

## General

The goals, to which Enspec Power Ltd aspires, are to avoid harm to people, avoid damage to the environment and community and avoid accidents.

Wherever Enspec Power Ltd has control or influence and so far as is reasonable and practicable to do so, the company will conduct its operations in such a way as to:

- Comply with applicable environmental legislation and relevant codes of practice.
- Integrate environmental considerations into business decision making.
- Minimise waste and to reduce, re-use or recycle where possible.
- Make efficient use of energy.
- Improve our environmental performance.

## Recycling & paper usage

Scrap and off cuts of copper arising from cable pulling and installations shall be taken to a scrap merchant for recycling. Waste paper & cans used in the office shall be collected separately and taken to a local recycling centre. Where possible, correspondence with suppliers, customers and between offices will be conducted by e-mail, so as to reduce paper consumption.

## Emissions and waste

We continuously work to decrease our use of energy and materials, and to decrease the amount of waste we generate. We constantly work to inform and educate our workforce, to improve their environmental awareness and responsibility. Licensed waste contractors will be employed, where applicable, for the removal of exceptional waste.

## Scope of work

The climate change levy was introduced in April 2001. Every UK business now faces heavy financial charges for inefficient use of electricity. By improving the efficiency of a company's electricity usage you can save money and also help to reduce global warming.

Enspec Power Ltd is an electrical engineering company that specialises in electrical energy efficiency; from variable speed drives & voltage optimisers to power factor correction.

## Regulations

Enspec Power Ltd will comply with the environmental protection act 1990, the environment act 1995, the clean air act 1993 and the control of substances hazardous to health regulations 2002 and any other regulations relevant to the environment.

## Environmental responsibility

The person with overall responsibility for environmental matters is:

Derek Hall – Health and Safety Representative
