

5. Environmental Policy Statement

Enspec Power recognises that all its activities have an impact on the environment in various forms and it is therefore a Company objective to minimise the effects through having an effective Environmental Management System.

Measures adopted for the implementation, maintenance, monitoring and improvement of the Environmental Management System include: -

- Complying with all relevant regulatory requirements and environmental legislation
- Working closely with customer's and suppliers to ensure its products and services have a minimal negative environmental impact during the initial design / development phase and over the lifecycle of the products supplied.
- Developing environmental awareness and vigilance in personnel at all levels within the company and taking appropriate corrective actions to reported problems and preventative actions to potential problems.
- Ensuring that all personnel understand their responsibilities with regard to the requirements of the Environmental Management System.
- A commitment to setting environmental objectives and targets to continually improve our environmental performance and prevent pollution.
- Making this policy available to the general public and potential and existing clients through conventional marketing methods and on the Company's web site.
- Considering the environmental impact when deciding on capital expenditure.

Authorised and approved by Steve Jones – Joint Managing Director.
